

Paper

Not All Paper is Created Equal

Digital Payment Technologies (DPT) knows you have a choice when selecting the paper you use in your parking pay station, but we want to make sure you understand the DPT difference.

We stand by our product

History shows that when problems occur, we're able to quickly and readily fix them. We show a greater interest in your product than anybody in North America and our customer service proves that.

Proper paper

Using a "low end" paper may not immediately affect anything but over time it could damage print heads. As well, the heat resistance on the Pay-And-Display products is huge. In Pay-By-Space operations, the paper should be layered with a top coat to ensure the images are not scuffed when handled frequently.

Proper inks

All inks are not created equal. DPT inks are specifically designed to work with thermal printers. Over time, ink buildup can cause irreversible damage to print heads.

Proper dimensions (width and O/D)

Large, wide, and narrow rolls all have negative effects on print heads. We know your specs and we stick to them.

Fresh Stock

Due to the volume of rolls we supply, you are always ensured of a "fresh" stock. Thermal paper has a limited shelf life, and old stock can have adverse effects on print heads.

Fast delivery

We inventory thousands of rolls of paper, and we can ship within 24 hours on almost all standard products.

Customization

Customized printing on the front and back of receipts is very popular. Text, watermarks, and advertising all are possible, with proofs usually turned around within 48 hours.

Our suppliers know thermal products

DPT works with leading paper suppliers who produce hundreds of different thermal products and know with confidence which products work reliably.

Full printer warranty coverage

Printer warranty is maintained by using DPT paper, which eliminates the potential risks for print head damage.

Contact DPT's Inside Sales Team today to learn more about our standard and custom paper options available to you and how you can save money through regular volume purchases.
